

Advanced Foot Mobilisation Techniques Level 3 Seminar

'Foot mobilisation and manipulation has a long history of clinical efficacy, the basics should be known by every podiatrist.'

www.latrobe.edu.au/podiatry/mobilmanip/maniphxtheory.html

This 1 day practical training will equip you with advanced patient and practice management skills to provide FMT effectively.

COURSE TECHNIQUES REVIEW:

- STJ Mobilisations
- Anterior Calcaneal Manipulation
- Posterior Talar Mobilisation
- Lateral Navicular Manipulation
- Cuneiform:1st Metatarsal
- Cuneiform Mobilisations
- Cuboid Manipulation/Mobilisation
- Proximal Fibula Manipulation
- Knee Subluxations (W.E.T.)
- Impactor Method for Talus, Navicular, Cuneiforms, Cuboid & Metatarsals.

COURSE OBJECTIVES:

On completion of this course, participants will be able to:

- Accurately perform the clinical assessments to determine patient suitability for the FMT treatment plan.
- Perform the 'FMT Education Script' to help patients understand the outcomes of the FMT treatment plan.
- Create the operating systems to double the standard consulting fees generated with FMT.
- Create the business systems to halve the consulting hours required for serving the same client base.
- Eliminate outstanding debts forever.
- Understand the role of 'Business Owner' and how it affects your 'bottom line'.
